The board decided that the best way to help Shosa update current use files in effort to meet state standards is to focus on necessary mapping updates with the help of Smith's mapping program. This program will provide the most recent aerial view (circa 2015) on all lots in the area. Smith gave a detailed demonstration on how to use the program to update the maps using the tax card information in the current use file. The goal is to update the maps to the exact specifications given in the files.
